### **Active Weather Warnings, Watches and Advisories by County:**

http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1

### **WEATHER SYNOPSIS BY REGION**

#### **NORTHERN CALIFORNIA**

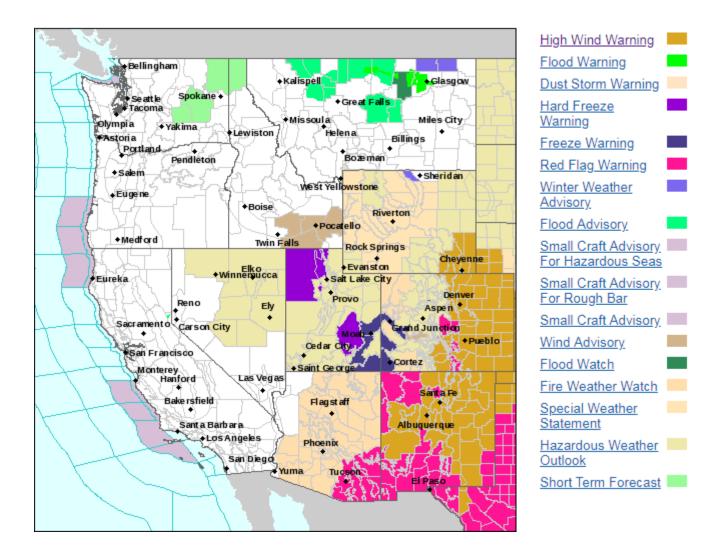

High pressure passing overhead today lead to a mostly sunny and dry day, but with temperatures remaining a few degrees below normal. The next system will be fairly weak and move onshore Wednesday afternoon. Showers from this low will mainly come between Wednesday evening and midday Thursday, and most of the precipitation will fall in the west and southern portions of the region. Snow levels will be 4,000-5,000 ft. Friday through Monday will be dry with temperatures around 10 degrees above normal as high pressure builds in from the Pacific. Light to locally moderate N-NE winds are expected from the western Sierra slopes to the coastal mountains, especially during the weekend.

#### **SOUTHERN CALIFORNIA**

Gusty north winds of 20-30 mph with gusts to 40 mph continued through the early morning hours across the transverse mountains extending from Santa Barbara County to northern and western Los Angeles County. These winds slowly ebbed through the late morning hours before becoming light by early afternoon. However, it remained breezy across the desert, Owens Valley and the central coast where winds of 15-30 mph were common throughout the day. Skies were clear across the entire district which allowed temperatures to warm into the upper 40s and 50s in the mountains to the lower 70s across the valleys of Southern California. After another day of warming Wednesday, another cold, moisture-deprived system will move through the area Wednesday night into Thursday, bringing scattered showers. Most areas will see under a quarter of an inch, but amounts will be highly variable due to the showery nature of the precipitation. Snow levels will be down to 4,500 feet and a brief flurry may even be possible on some of the passes into Southern California Thursday morning. Temperatures will drop back to a few degrees below normal and gusty north winds will be possible Thursday afternoon into Friday. The weather this weekend looks warmer and much less windy with highs climbing back to near normal under sunny skies.

### **WEATHER MAP**

### **Cal OES LAW ENFORCEMENT MISSIONS**

### **Cal OES Law Missions**

Nothing to report.

### **Cal OES MISSION TASKING**

#### **Cal OES Missions**

- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene Long-term assignment)
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County (Coordinating)
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- 2017-Inland-42559: Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

### Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
